2. What are your weaknesses?

I'm Not fluently speak English but now a day I work on it . "Second Is I'm improve my public speaking skills.I sometimes feel nervous when presenting in front of large groups.

3. Where do you see yourself in five years?

"In five years, I see myself as senior development role, contributing in large-scale projects.

4. Why should we hire you? OR Strength

"You should hire me because I have strong technical background, also with proficient in various programming languages, frameworks, and databases. I have good Problem Solving and debugging skills make me perfect candidate for this role".

5. Why are you work here?

"I work at Webelight because it offers a dynamic and innovative environment where I can apply my skills and creativity to help businesses grow in the digital space. The company's focus on delivering high-quality, customized solutions aligns with my passion for technology and design. Additionally, being part of a team that values collaboration and continuous learning motivates me to contribute to impactful projects and grow professionally."

6. One of the challenging projects I completed is the "Trade Mentor"

Android mobile application, which I developed in Java. The project involved complex tasks such as API integration, implementing a secure login system using Google Login API and OTP authentication, and managing data with SQLite and Firebase. The challenge lay in ensuring real-time data accuracy and providing a seamless user experience, which I successfully achieved through careful design and testing.

My name is kenil Goswami , im an it student at Ganpat university with cgpa of 8.32 also with strong foundation in software developing , web developing and database.

Im proficient in various programming languages like c , c++ , java , JavaScript , python and php. My experience include working with various framework and libraries like react js , next js , node js, and express js also managing database like firebase , MongoDB , MySQL , SQLite

I chose to go into IT because I've always been passionate about technology and how it drives innovation. I enjoy solving complex problems and working on projects that have a real impact
